1. About PROPECTUS BIZLINK

We work as a manpower sourcing and staffing partner for organisations that need dependable workforce support. Our approach is built around understanding the client's job requirements, mobilising candidates, screening them against the role, coordinating documentation and supporting deployment.

Why Manufacturing?

Manufacturing is a major employment and industrial ecosystem in India, and Tamil Nadu has a strong presence in automotive, electronics, textiles, leather and other manufacturing sectors. The MSME ecosystem also plays a major role in employment and industrial supply chains. ■cite■turn0search10■turn0search11■

Service	What We Support
Bulk Manpower Supply	Operators, helpers, assemblers, packers, warehouse and support workforce.
Contract Staffing	Workforce deployment for defined operational requirements, subject to client and statutory arrangements.
Production Workforce	Personnel for line production, assembly, material handling and process support.
Technical Recruitment	CNC/VMC/HMC operators, technicians, maintenance and skilled industrial profiles.
Quality Workforce	Quality inspectors, line quality and documentation support.
Warehouse & Logistics	Pickers, packers, loaders, dispatch, inventory and warehouse operations.
Recruitment & Placement	Candidate sourcing, screening, interview coordination and joining support.
Replacement & Continuity Support	Support for replacement hiring and workforce continuity based on agreed client requirements.

Our service model

Requirement → Sourcing → Screening → Interview Coordination → Documentation → Joining → Workforce Support

2. Manufacturing Manpower Structure

We can structure manpower deployment around the client's production process. Typical manufacturing functions we can support include:

Function	Possible Manpower Profiles
Production / Assembly	Assembly Operator, Production Operator, Line Worker, Helper, Sub-Assembler
Machine Operations	CNC Operator, VMC Operator, HMC Operator, Machine Operator, Press Machine Operator
Fabrication	Welding Helper, Fabricator, Fitter, Sheet Metal Worker, Grinding/Finishing Worker
Quality	Quality Inspector, Line Quality Checker, Final Inspection, Quality Assistant
Material Handling	Material Handler, Stores Assistant, Loading/Unloading, Material Movement
Warehouse	Picker, Packer, Warehouse Associate, Inventory Assistant, Dispatch Assistant
Packaging	Packing Operator, Labeling, Sorting, Sealing, Finished Goods Packing
Maintenance	Maintenance Helper, Mechanical Technician, Electrical Technician, Utility Support
Logistics	Dispatch Coordinator, Loading Team, Delivery/Transport Support
Admin / Support	Production Coordinator, Data Entry, Time Office, Documentation Support

Typical production-line structure

Raw Material / Stores	→	Production	→	Assembly	→	Quality	→	Packing & Dispatch
-----------------------	---	------------	---	----------	---	---------	---	--------------------

3. Sector-Wise Manufacturing Support

Automotive & Auto Components

Assembly, production operators, machine operators, quality inspectors, welders, fitters, warehouse and logistics workforce.

Electronics & Electrical

Assembly operators, soldering/production support, testing assistants, quality, packing and material-handling workforce.

Engineering & Industrial Products

CNC/VMC/HMC operators, fitters, fabricators, machine helpers, inspection and stores personnel.

Textiles & Garments

Production helpers, machine operators, checking, finishing, packing and warehouse manpower.

Consumer Products / FMCG Manufacturing

Production line workers, packing, sorting, material handling, quality and warehouse support.

Plastic / Injection Moulding

Machine operators, moulding helpers, trimming/finishing, quality and packing manpower.

Warehouse & 3PL Operations

Pickers, packers, inventory assistants, loaders, dispatch and warehouse associates.

Food Processing

Production helpers, packing, quality support, material handling and hygiene-support workforce.

Candidate sourcing & screening approach

- Requirement mapping: understand headcount, shift pattern, qualification, experience, salary structure and joining timeline.
- Candidate mobilisation: local and outstation sourcing through recruitment networks and job-seeker databases.
- Initial screening: basic qualification, experience, location, language and role suitability.
- Interview coordination: organise candidate interaction with the client and support joining formalities.
- Deployment support: coordinate joining, attendance-related communication and replacement requirements according to the service agreement.

4. Why Choose PROPECTUS BIZLINK

Fast mobilisation	Structured candidate sourcing for urgent and bulk manpower requirements.
Role-based screening	Candidates are screened against the job description and basic client criteria.
Manufacturing focus	Understanding of production, assembly, machine operation, quality, warehouse and packaging functions.
Bulk hiring capability	Suitable for ramp-ups, new lines, seasonal requirements and replacement hiring.
Employer coordination	Single point of coordination for sourcing, interview scheduling and joining support.
Flexible workforce support	Solutions can be aligned to the client's operational model and agreed commercial terms.
Candidate communication	Regular coordination with candidates to reduce dropouts before joining.
Long-term partnership	Focus on service quality, workforce continuity and repeat hiring requirements.

Our Partnership Promise

We aim to become a dependable manpower partner for manufacturing organisations by combining candidate reach, structured recruitment, responsive coordination and workforce support.
